

**HIGH PERFORMANCE PAINTS, COATINGS AND
RESINS FOR CONSTRUCTION, CHEMICAL AND
PETROCHEMICAL INDUSTRY**

WOLFTANK
AUSTRIA

Our ultimate goal is the preservation of the environment through sustainable maintenance of your plants. The efficiency of our products is trusted and appreciated by over 11,000 customers, for protecting the value of their plants and properties and therefore the air, soil and water.

Our deep focus on safety and quality, together with our solid commitment to soil and water protection, enable our customers around the world to sustain their industrial development while maintaining environmental integrity.

Wolftank Austria's excellent performance is also shown through the high-quality brand Adisa – our market-leading, in-house developed epoxy resins – and our patented tank lining system DOPA®, among other state-of-the-art technologies.

We operate successfully in different industries, among others in the petroleum, chemical and water sectors. Our qualified staff and the longstanding experience within Wolftank Group ensure finding the best solutions for our customers.

Wolftank Austria linings have been developed for the protection of resources. More specifically, we protect one of the most valuable on the planet: water.

- 1,000,000 m² coated with EPOFLEX® products
- 600,000 m² refurbished to double wall / floor with the DOPA® system
- 3,000 vacuum and pressure leak detection systems (class 1 acc. EN 13160) installed
- More than 11,000 satisfied customers
- More than 30 years of experience

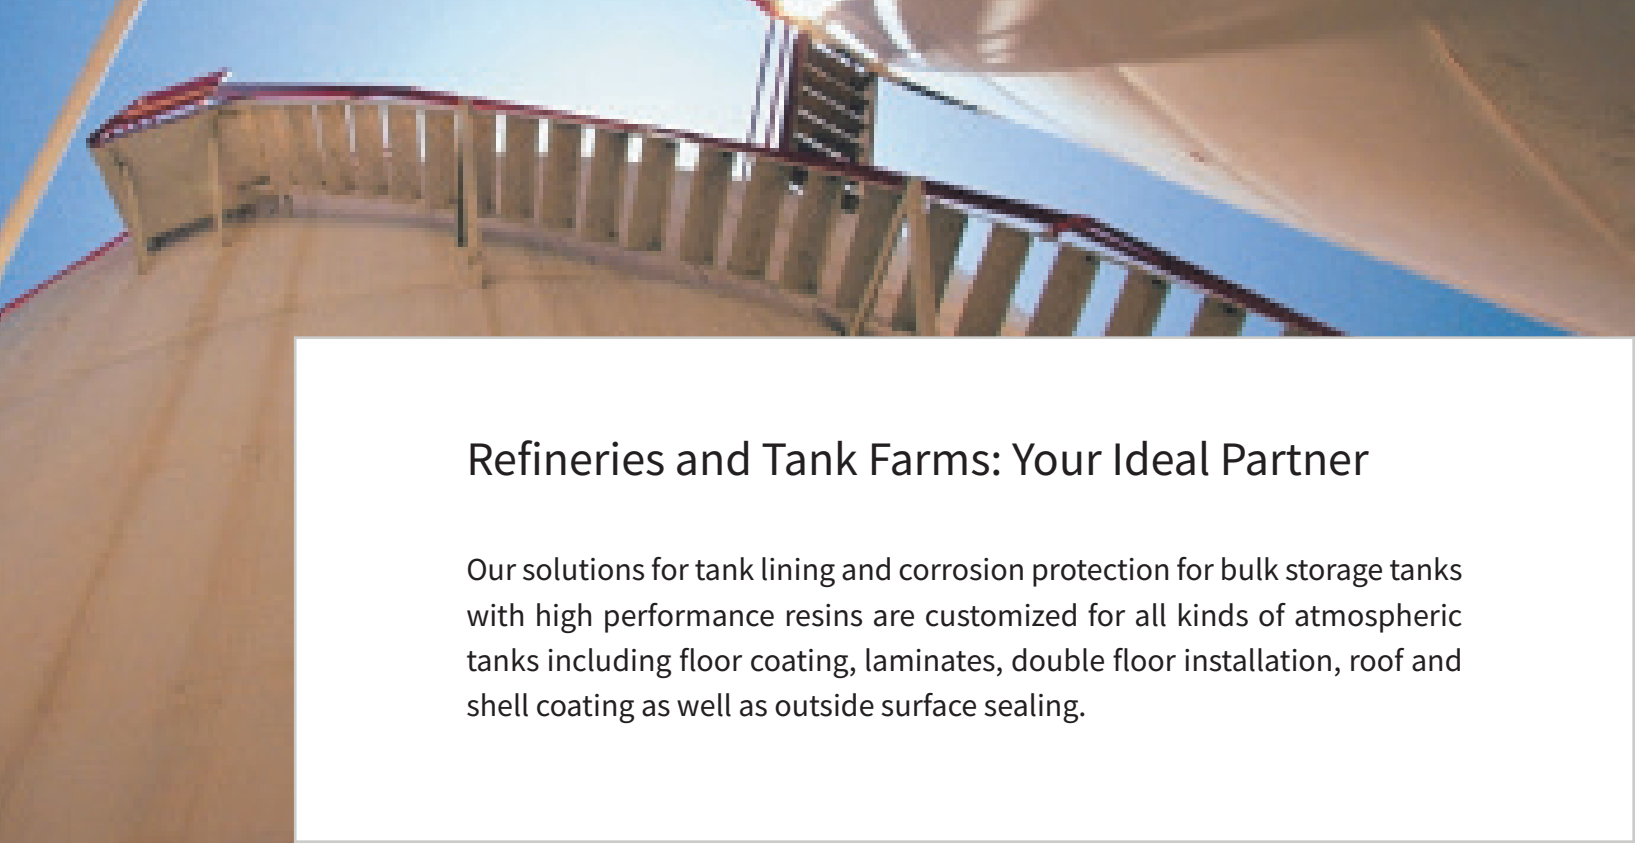

Underground tank with DOPA® application

Wolftank Austria: Striving for Excellence

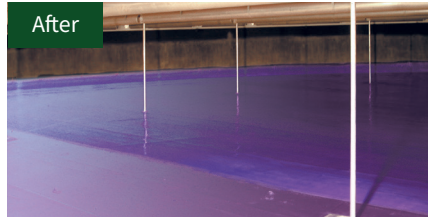

We are supporting the development of new technical standards for chemical and petrochemical storage plants. Our standards for safety, reliability and quality of products and services are verified and certified by independent external institutions.

Our procedures are certified according to ISO 9001, ISO 14001 and ISO 45001 and subject to continuous optimisation efforts. Furthermore, the production of coatings, paints and resins is monitored by the TÜV SÜD to ensure the highest quality standards.

Refineries and Tank Farms: Your Ideal Partner

Our solutions for tank lining and corrosion protection for bulk storage tanks with high performance resins are customized for all kinds of atmospheric tanks including floor coating, laminates, double floor installation, roof and shell coating as well as outside surface sealing.

Floor coating, laminates double floor system with leak detection

Outside surface sealing and refurbishment of ring wall

Refurbishment and surface sealing for secondary containments and loading area

Chemical Industry: Always on the Safe Side

Wolank Adisa's experience in the field of corrosion protection and refurbishment of storage tanks for the oil and gas industry leads to a wide range of extremely chemical resistant coating.

Gas Stations: A Tailored Proposal

For a sustainable maintenance and refurbishment of a station the following aspects shall be considered:

- Double wall installations for tanks and pipes with continuous leak monitoring according to EN 13160-2
- Water tight surface sealings and secondary containments
- Treatment of waste water and rain water according to EN 858-1 and EN 12566-3
- Qualification of personnel with ongoing HSE training
- Robotic processes to avoid human error and HSE exposure of technicians
- Preassembled removable gas station modules

Our 30 years of experience make us the perfect partner to provide you with top of the line products and technologies for your business success.

About the Woltank Group

Woltank Group is a leading global technology partner for energy and environmental solutions. Founded in 1987 in the Alpine region, it has been a pioneer in our sector, successfully operating in the field of engineering and environmental protection. Today, it has subsidiaries operating in seven countries and three continents, providing solutions to customers in more than twenty countries.

Woltank Group develops and implements the technologies of the future to decarbonise transport and build the infrastructure for zero-emission mobility. It actively contributes to the achievement of global climate goals by developing and building the necessary infrastructure, such as Bio-Hydrogen or LNG refuelling stations.

As a leader in environmental solutions, the company offers assessments, due diligence and customised services for soil and water remediation as well as direct waste management.
